Address Bangalore

Skills

• Technical

Python, C++, JavaScript, Node.js, TypeScript, Bash, AWS, HTML, CSS, RESTful Api,

• Frameworks / Libraries

React, Material UI, React Native, Express, Expo, Redux, Tailwind, Flowbite, ANT design, Firebase

• Relational DBMS

MySQL, MongoDB, PostgreSQL, OracleDb, SQLite3

• Platforms

GIT, Terminal, VSCode, Postman

• Interpersonal

Mentoring and Coaching, Conflict Resolution, Team Building, Cultural Competence.

• Interests

Woodwork, Learning new skills, Personal Growth, Travelling

Certifications

AWS - Cloud Practitioner

Udemy - Full MERN development

HackerRank - Problem Solving

HackerRank - Python

HackerRank - SQL

HackerRank - React

Coursera - Python Data Structures

Coursera - Py' to access Web Data

Software Developer Engineer

Innovative Full Stack Developer specializing in React and MERN stack. Expert in crafting dynamic UIs and integrating sleek APIs. Passionate about building scalable, high-impact web applications that deliver exceptional user experiences.

Education

- B.Tech : SRM University, Chennai** Jun'18 - May'22
Computer Science and Engineering with Specialisation in Cyber Security
- HSc. (XII) : KV, Jalandhar** Apr'16 - Mar'17
PCM

Work Experience (3.5 yrs)

- Qubrid AI** Mar'24 - Sep'24
Full Stack Developer | Fulltime

-Qubrid UI

React.js | MUI

- Spearheaded the development of Qubrid's website from inception, demonstrating proficiency in building it from the ground up.
- Developed Frontend React components to seamlessly interface with the Backend framework, adeptly diagnosing and rectifying interface software issues and debugging application code.
- Engineered APIs to integrate seamlessly with new frontend features, facilitating smooth functionality and enhancing user experience.

-Dihuni GPU Controller software

React Native | MERN | MUI | Git

- Spearheaded the development of Dihuni's website from the ground up, building and optimizing frontend React components for seamless backend integration.
- Developed and managed databases, APIs, and middleware using Node.js, Express.js, and MongoDB, while diagnosing and resolving software issues.

- Brillio** Jun'22 - Feb'24
Full Stack Developer | Fulltime

-Verizon

React.js | Node.js | MongoDB | Express.js | Redux | Git

- Contributed to the feature creation of a web application for Verizon using MERN and Redux.

-Puma

React.js | Node.js | MongoDB | Express.js | Redux | Git | REST Api

- Integration of user-facing elements developed by front-end developers with server side logic by developing REST APIs.
- Design and implementation of low-latency, high-availability, and performant applications.
- Created Apis to work hand in hand with new features in frontend.

- Cerebry** Jun'21 - May'22
Backend Developer | Fulltime

Python | Prolog | LaTeX

- Migrated the site's stack from Prolog base to Python3, Reviewing application requirements and interface designs.
- Writing Python functions to interact with the Prolog framework, Troubleshooting interface software and debugging application codes.
- Developing and implementing LaTeX to support site's UI, Monitoring and improving backend performance.
